

Andrew Dunn

User Experience Designer & Strategist
San Francisco, Bay Area

About

As a passionate UX designer and strategist, I value product utility, simplicity, and beauty. I aspire to delight users with crafted experiences that seemingly work "like magic." And I believe good design is humble: open-minded, collaborative, informed by evidence, and attune to user needs.

Experience

Sr. UX Designer & Team lead

Aug, 2013 - Present

Intel - Santa Clara, Ca

3+ years

I was the lead interaction designer for Intel's flagship multi-device security product McAfee® Total Protection™ (Win8, & Metro, Android & Web). 80+ million users.

I collaborated with product managers throughout the discovery/ideation phase to define product requirements, create concepts, weigh stakeholder input and constraints, and worked closely with development teams to ensure product efficacy.

I presented ideas in tangible forms: sketches, interaction flows, mockups, prototypes, and conducted usability research to validate assumptions and support proposed solutions.

QA Engineer

Jun, 2010 - Aug, 2013

Fullpower Technologies - Santa Cruz, Ca

3+ years

I designed, implemented and performed complete software testing life-cycle for wearable medical devices, medical apps, navigation apps, and games for iOS and Android: The Jawbone UP band, Nike+ Running, MotionX-GPS Drive, MotionX-GPS, Sleep by MotionX, MotionX Poker Quest, and MotionX Dice.

Web Designer

Jan, 2009 - Jan, 2011

PealDesigns - San Francisco, Ca

3 years

This is how I got started as a UX designer. Ask me about it ;)

Education

MS, Human Computer Interaction

Jun, 2013

San Jose State University

BA, Studio Art

Jun, 2008

University of California, Irvine
